

Documentation of
SOLCAMP AWARD

Partner:

APEA

**Province of Agrigento, Sicily
ITALY**

Foto of camping site / awarding procedure:

Name of the camping site	
Location:	Cattolica Eraclea (Province of Agrigento)
Date of awarding:	26.04.2008
Participants:	Camping guests and APEA representatives
Short description of the system and reason for awarding:	<p>About 30 m² of new flat collectors were recently installed at Eraclea Minoa Village. The whole system is composed of 14 different plants, one for each bungalow. Each plant is designed for natural circulation of water. One boiler (160 litres) is installed in each bungalow.</p> <p>The Eraclea Minoa Village showed greatest interest to the solar thermal energy and to the Solcamp project too. Few old panels for showers already were installed and the camping boss decided to install the new ones during the Solcamp project duration. Training for Italian SolarCheckers was held at this camping site.</p>
